PROFILE

Aspiring Data Analyst with knowledge of Data Science, Data Analytics, Python, SQL, and Excel. Completed projects such as Student Performance Report Dashboard, Invoice Maker Application, and Taj Gurukul Website. Interested in analyzing data, finding useful insights, and solving real-world problems. Quick learner, hardworking, and eager to gain practical experience while growing in the field of Data Analytics and Data Science.

WORK EXPERIENCE

Content Associate

2025-2026

Teaching Pariksha

Content Associate with experience in class scheduling, test creation, PPT development, content management, and educational platform administration. Skilled in handling live streaming through Restream, resolving Smart Board technical issues, coordinating with faculty, and ensuring smooth academic operations and student learning experiences.

WEB DEVELOPMENT TRAINEE

2024

ICEICO Technologies

Creating visually appealing and responsive web pages using HTML, CSS, or JavaScript

Collaborating with designers: Working with UI/UX designers to bridge the gap between graphical design and technical implementation

PROJECTS

Student Performance Report Dashboard

- Collected and organized student academic data from multiple sources.
- Cleaned and processed the dataset by handling missing and incorrect values.
- Analyzed student performance based on marks, attendance, and subject-wise scores.
- Created visualizations and dashboards to identify trends and performance patterns.
- Generated reports to help understand student strengths and areas for improvement.
- Presented insights using charts and graphs for easy decision-making.
- Tools Used: Python, Pandas, Excel, Matplotlib/Power BI

Invoice Maker Application

- Designed a system to automate invoice generation.
- Created input forms for customer and product details.
- Implemented automatic calculation of prices, taxes, and totals.
- Generated professional invoices in a structured format.
- Added functionality to save and manage invoice records.
- Improved efficiency by reducing manual billing work.
- Tools Used: Python, Tkinter/Streamlit, Excel/CSV

Taj Gurukul Educational Website

- Gathered information about courses, faculty, admissions, and institute facilities.
- Planned the website structure and user navigation.
- Designed responsive web pages for students and parents.
- Added course details, contact information, and inquiry forms.
- Optimized the website for better user experience and accessibility.
- Created an informative platform to help students explore educational opportunities.
- Tools Used: HTML, CSS, JavaScript, React/Next.js (if used)
